Physician Speaker Series Event: Understanding Abnormal Pap and HPV Results

(NILES) – According to the Centers for Disease Control and Prevention (CDC), each year an estimated 3 million women get unclear or abnormal Pap test results. Most of these women do not have cervical cancer; however, some kinds of abnormal cells could turn into cancer later. Community members are invited to learn more at this free seminar for women led by Karen Zienert, MD, a board-certified Obstetrician/Gynecologist from Southwestern Medical Clinic, Niles.

During the seminar, Dr. Zienert will discuss how often and at what age women need a Pap test, the facts about the HPV virus, and what Pap and HPV results really mean for women and their physicians. Registration is encouraged; walk-ins are welcome. For more information, call (269) 556-2808 or (866) 260-7544.

Thursday, August 22

6:00 to 7:00 p.m.

Lakeland Medical Suites, Niles

Community Conference Room

42 N. St. Joseph Avenue, Niles
