Veterans and their spouses and dependents can now take any of 11 short term training courses **for free** with scholarships available from the Lake Michigan College Foundation.

Healthcare and manufacturing are two of the largest industries in southwest Michigan. With one of these short term training courses, you will be prepared to enter these fields within months!

Each course prepares you to sit for a nationally-recognized certification, and some include the certification exam at the end of the course. They can also move you closer to a degree through the Credit for Experiential Learning program.

Courses are available at the Allegan Tech Center, Napier Avenue Campus, M-TEC, and Bertrand Crossing Campus. Check our website for specific program location.
